

Test Automation using CAFÉ Next

Tech Fiesta 2014

People matter, results count.

What is CAFÉ Next?

An unified test automation framework

- Mandates test cases are authored in a standard way
- Generates automated test scripts

Test Case Authoring

- Component based test design technique
- Build test cases using components
- Integration with Quality Center
- Using simple web interface or Excel add-in

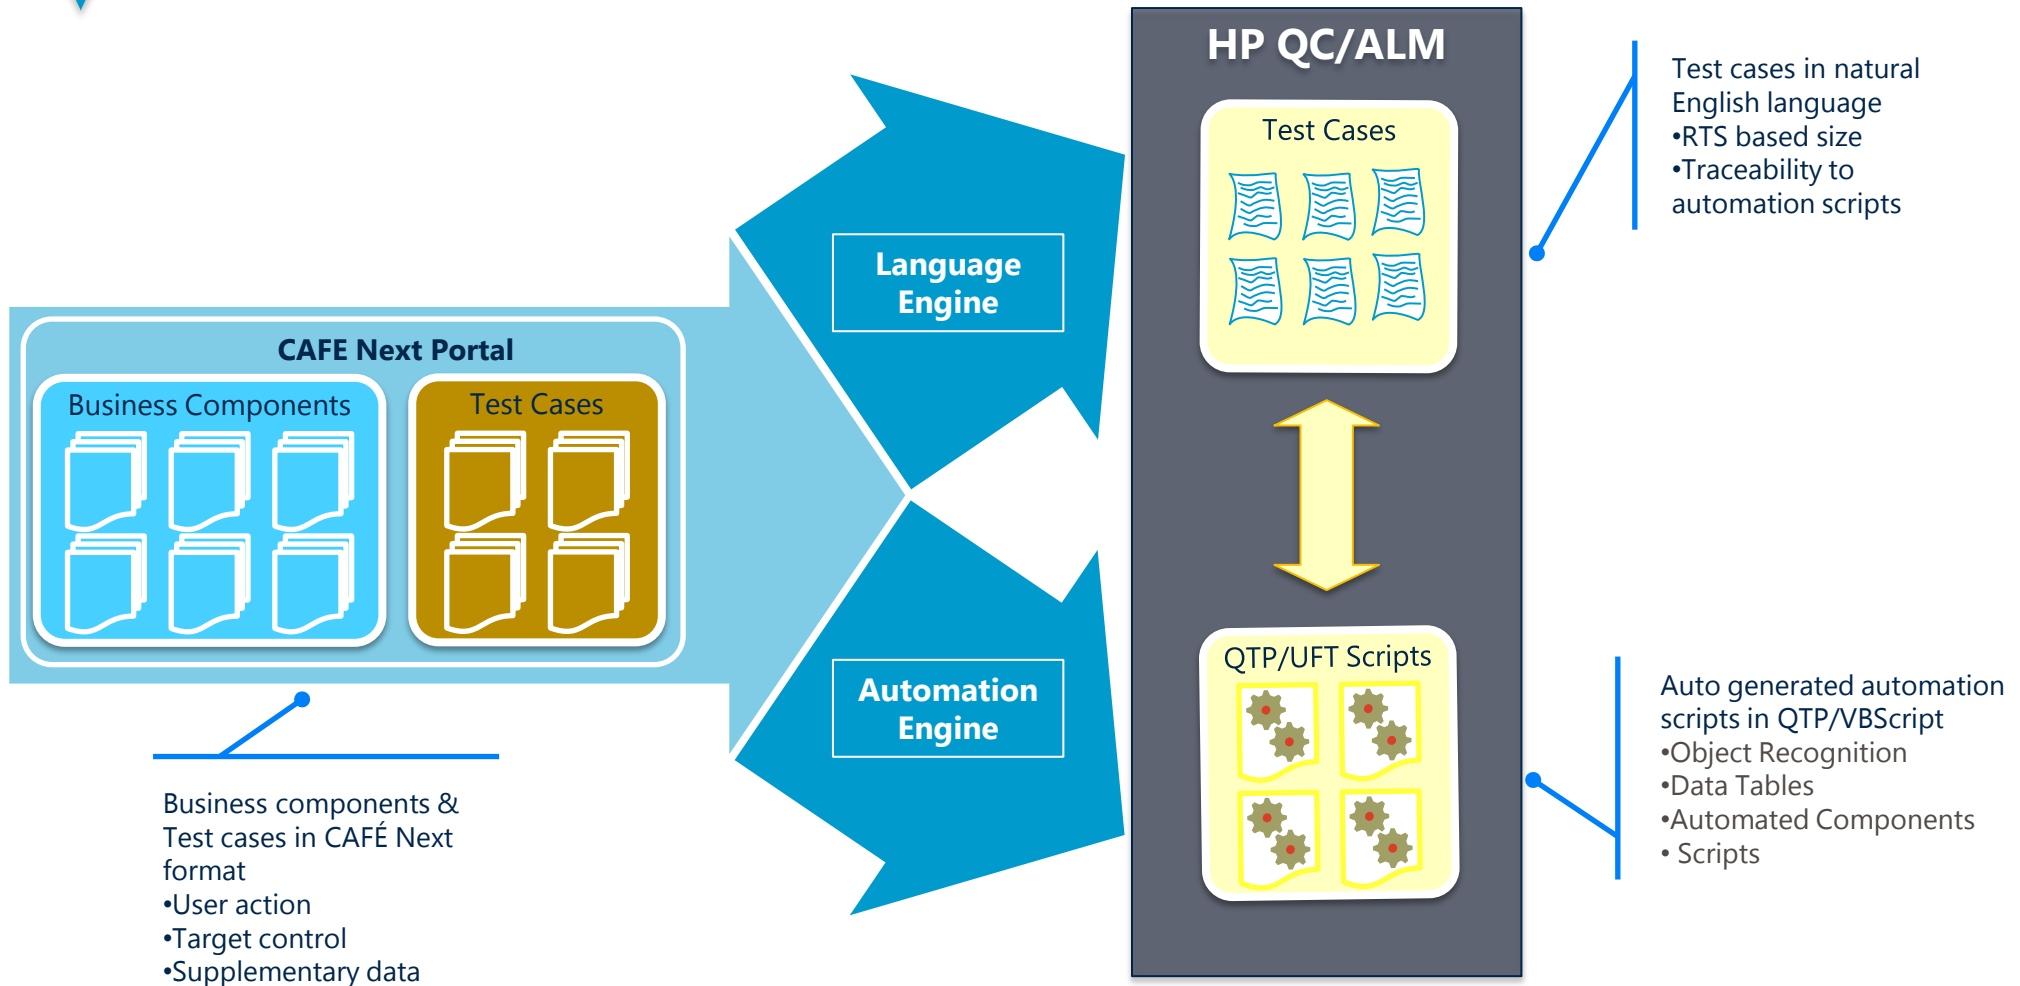

Automated Script Generation

- Faster script development
- Generates standards compliant scripts
- Manual testers can generate automation scripts
- Uses core features of HP QTP & integrates with QC

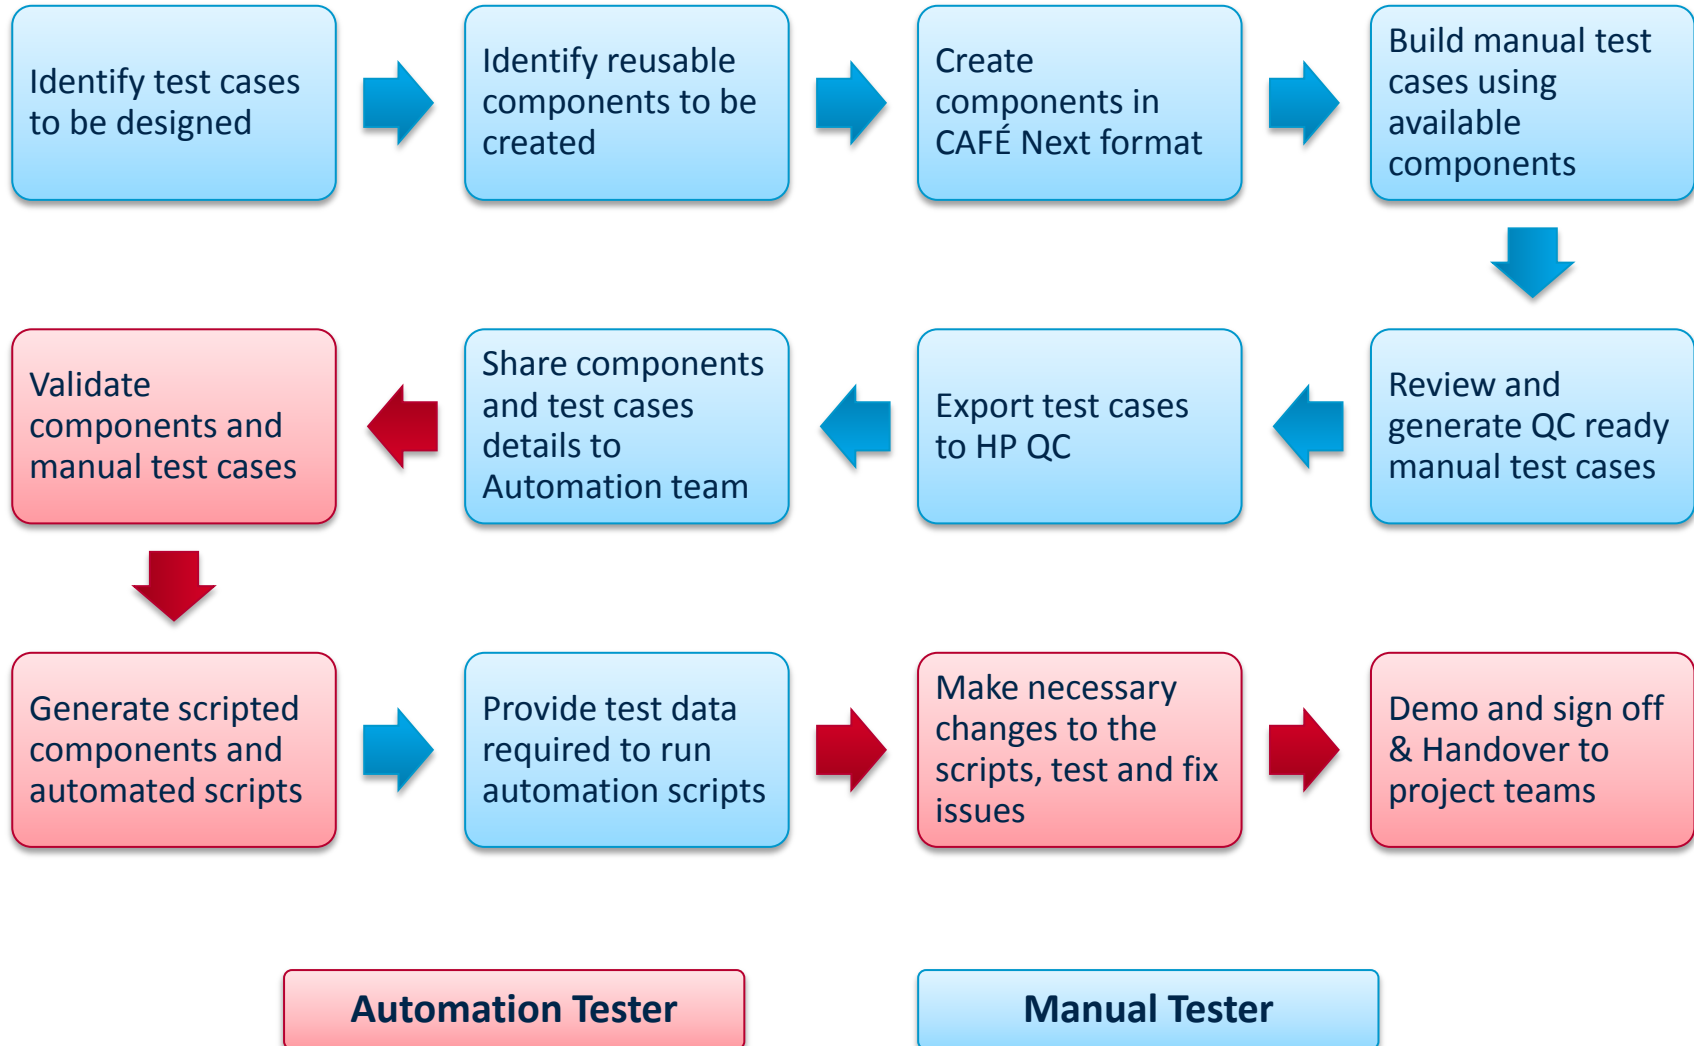

Test Planning and Management

- Measure size of test cases designed and executed, Manual and Automated, using RTS
- Accuracy in calculating productivity

The Big Picture!

How CAFÉ Next work?

CAFÉ Next Vs Other Automation
